

Apps for people with hearing loss

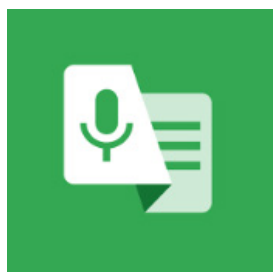

TapSOS

Available for purchase from the App Store and Google Play Store. TapSOS allows a user to contact Emergency Services by tapping on a series of visual icons without having to speak on the phone.

Relay UK

Free app available for download from the Apple Store, Google Play Store or the Microsoft Store.

The Relay UK app links your phone number with Relay UK to provide a text connection in parallel with any phone calls you make.

Live Transcribe

Free app available for download from the Google Play Store.

Live Transcribe provides instant, real-time captioning for people with hearing loss to have conversations more easily.

For more information about these or other apps. please contact Deafblind UK:
