

## Apps for people with sight loss

### Be My Eyes

Free app available for download from the App Store and the Google Play Store.

BeMyEyes provides live video calls with sighted volunteers to support individuals with sight loss or blindness to locate objects, read texts, complete tasks, etc.

### Tap Tap See

Free app available for download from the App Store and the Google Play Store.

TapTapSee uses a mobile camera to take photos of objects and identify them aloud for the user.

### Seeing AI

Free app available for download from the App Store.

Seeing AI provides audio descriptions of nearby people, texts and objects for the user.
