

Magnifiers

Today's magnifiers range from hand-held, pocket-sized devices to large desktop magnifiers. Some can change colour of texts, contrasts, lighting, provide audio description, and more.

EasyPOCKET

The easyPOCKET is a handheld magnifier. It provides a 2.5x magnification and comes with an LED light.

Eye-D v2

4.3-inch handheld video magnifier. Has up to 32x magnification, switchable LED lighting, freeze frame with zoom, adjustable screen brightness and contrast, two reading positions, and two handwriting positions.

Clover 6

5.5-inch portable handheld video magnifier that can provide up to 35x magnification and distance viewing. This magnifier has tactile buttons and a touchscreen, auto-focus camera, and a 2-in-1 stand and handle.

Luna S

Handheld video magnifier that can provide up to 19x magnification.

This magnifier can auto-focus, freeze frame, change colours and modes.

The Luna S has a flashlight, tactile control buttons, and voice-control.

Acuity Full HD

A desktop video magnifier.

It has full A4 page width viewing and provides between 2x – 65x magnification.

The Acuity Full HD has 2 photo modes, up to 10 contrast modes, and touchpad technology.

You can purchase magnifiers from:
