

Otter.ai

What is Otter.ai?

A smart AI meeting assistant that automates meetings from start to finish.

What does it do?

Otter.ai produces realtime transcriptions during meetings, webinars, virtual events, or in-person. It can also connect to your online calendar, join meetings, capture shared meeting slides, and send you meeting summaries after the events.

Features

- **OtterPilot:** Connects to your Google or Microsoft account to sync details.
- **Otter Chat:** Answers questions made about the content of the conversation or meeting.

- **Automatic summary:** Automatically generates and displays a live summary of a conversation during a recording.
- **Automatic Slide Catcher:** Automatically adds slides or screen shares from your meeting to the conversation notes.
- **Recording conversations:** Allows you to record a conversation on your computer or mobile device.
- **Transcribing:** Automatically transcribes in real-time during online and in-person meetings.
