

TV listeners

What are TV listeners?

TV listeners are assistive listening devices that transmit TV audio directly to personal headsets, speakers or hearing aids.

What do TV listeners do?

TV listeners improve audio clarity, reduce background noise, and allow independent volume control without affecting others in the area.

Types of TV listeners:

- **Wireless TV headsets:** headphones with a transmitter connected to the TV.
- **Wireless TV speakers:** Portable speakers that receive audio wirelessly from the TV.
- **Hearing aid TV streamers:** Devices that transmit TV audio directly into compatible hearing aids.

Where can I buy a TV listener?

- **Visably:** <https://www.visably.org.uk/>
- **RNIB Shop:** <https://shop.rnib.org.uk/>
- **Connevans:** <https://www.connevans.co.uk/>
